

Vaishnavi Sanjeevkumar Kulkarni

vaishnavikulkarni116@gmail.com | +1 (716) 936 6154 | LinkedIn: kulkarnivaishnavi116

Professional Summary:

Supply Chain and Data Analytics professional with 3+ years of experience driving operational efficiency through predictive modeling, automation, and business intelligence. Skilled in applying statistical and machine learning techniques to forecast demand, optimize inventory, and enhance decision-making. Experienced in cross-functional collaboration, process improvement, and delivering actionable insights in supply chain and manufacturing domains.

Education:

University Of Buffalo, The State University of New York

Aug 2024 – Dec 2025

Master of Science in Industrial Engineering

Business Intelligence & Analytics, E-Business and S.C.M, Production Planning and Control, Data Analytics & Predictive Modelling

M.E.S.W.O.E, Savitribai Phule Pune University

Apr 2019 – Jul 2023

Bachelor of Engineering in Mechanical Engineering

Product Design & Development, Data Analytics Lab, Industrial Psychology & Organizational Behaviour

Professional Experience:

Supply Chain & Operations Analyst — Global Impex USA — St Cloud, MN

May 2025 – Dec 2025

- Managed international textile order execution, including inventory monitoring, shipment tracking, and invoicing accuracy.
- Collaborated with logistics providers to monitor vessel ETAs, reducing customer inquiry response time by 30%.
- Developed reconciliation checks between order data and invoices, improving billing accuracy across multi-shipment deliveries.
- Optimized reporting workflows using vendor database integrations, streamlining data access for supply chain teams.
- Forecasted supply needs using Excel and warehouse data, improving inventory planning reliability.

Sr. Supply Chain Analyst — Siemens Pvt Ltd — Mumbai, India

Jul 2023 – Jun 2024

- Built interactive Power BI dashboards for procurement and inventory, reducing tracking time by 25%.
- Automated vendor reporting and procurement workflows with Python and Power Query, lowering operational costs by 12%.
- Supported new product launches by coordinating sourcing activities across engineering, procurement, and logistics.
- Partnered with R&D to implement sustainable packaging initiatives, advancing company ESG goals.
- Delivered diagnostic insights that reduced bottlenecks in procurement cycles and improved supplier performance.

Project Manager — Neptune Engineering Pvt Ltd — Pune, India

Aug 2022 – Nov 2022

- Designed AutoCAD system layouts and maintained BOMs, improving design precision and reducing change orders.
- Standardized engineering documentation processes, cutting review cycle time by 20%.
- Integrated structured feedback loops across teams, improving project approval turnaround and execution efficiency.

Project Engineer & Procurement Lead — BAJA SAEIndia – Team Gyrfalcons — Pune, India

- Designed ATV steering system in Catia V5, improving manoeuvrability on uneven terrain.
- Led procurement activities with a 10K budget, overseeing vendor selection, order tracking, and P2P cycle execution.
- Secured 20K in sponsorships from industry partners, offsetting project costs and expanding resource availability.
- Managed supplier documentation and compliance, enabling smooth participation in national-level competitions.

Projects:

Energy Insecurity Prediction (R, GIS, Machine Learning)

- Analyzed demographic, economic, and climatic datasets to predict energy insecurity hotspots in U.S. regions.
- Applied clustering, regression models, and ML techniques to capture spatial and temporal poverty trends.
- Built geospatial dashboards integrating socioeconomic indicators with energy statistics for policy planning.
- Generated insights showing disproportionate energy burdens on low-income and single-parent households, supporting targeted intervention strategies.

CitiBike Demand Forecasting (Python, Pandas, Seaborn, XGBoost)

- Forecasted demand for 800+ CitiBike stations with ML models, enabling optimized rebalancing operations.
- Created dashboards to visualize usage patterns by hour/day/month, improving resource allocation and planning.

Skills:

Databases & Visualization: SQL, Power BI, Tableau, Google BigQuery, Matplotlib, Seaborn

Programming & Analytics: Python, R, MATLAB, Predictive Modeling, Machine Learning, Regression, Clustering

Geospatial & Statistical Tools: GIS, Spatial Analysis, Data Fusion, Energy & Climate Data Modeling

Cloud & Platforms: AWS, Azure

Engineering & Design Tools: Catia V5, SolidWorks, Fusion 360, AutoCAD

Other Skills: SAP, Inventory & Logistics Management, Process Automation, Project Documentation, Cross-Functional Collaboration
